

Property Management

Maintaining and managing your property when it is not in use is vital. If you purchase through us we can provide you with a range of alternatives. We do offer a full management service for those who require it, this will include everything from finding renters for your house to making sure the house is ready for winter or that you guests are greeted from the airport, However there are some areas we personally are unable to carry out this service due to distance and locality in such cases we usually have partners or contacts in most areas that can assist in the management of your property. In Slovenia neighbours are only too keen to help for a small fee to maintain the garden or carry out various requests to keep your house in shape. Sometimes the use of a neighbour can bring advantages as you have someone to watch over the house in your absence. Either way, we will help make sure that your house is looked after and any day to day requirements are taken care of.
